

JOHN T. STONE
SENIOR CONSTRUCTION MANAGER

SUMMARY OF QUALIFICATIONS:

- Forty-seven years of experience in operations and supervising petroleum industry construction operations, including pipeline installations of more than 100 miles.
- Specialized in supervising multiple disciplines:
 - Building roads and locations
 - Drilling pits
 - Cleanups
 - Re-claiming
 - Pipelines
 - Tank battery installation
 - Pumping stations
 - Compressor stations
- Experienced in upgrade and maintenance of production facilities.
- Experienced in commissioning of pipelines and batteries to ensure purging and proper operations, and putting them into production.
- Proficient in supervision and operation of heavy equipment:
 - Cranes and forklifts
 - Hand signals used for crane operations
 - Proficiency in operation and supervision of side booms and lifting equipment:
 - Stringing, bending, and pipe laying
 - Pipeline tie-ins
 - Determining cable positioning for safe operation and understanding reactions of lines with non-plumb positioning
- Experienced in managing expectations of landowners during the development of their property.
- Qualified in the development of contracts, estimating, and contractual responsibility for projects, including day-to-day operations.
- Skilled at imparting hands-on experience to younger or lesser-qualified personnel, and fostering teamwork, proper planning, communications, and safety.
- Dedicated to problem-solving and considering new, more efficient options as the industry evolves.

EXPERIENCE:

SIGNA ENGINEERING CORP.

2010 – PRESENT

Senior Construction Manager, Cheyenne Project, South TX

- Supervising all drilling and production construction and maintenance.
- Clearing, leveling, and grading (access roads, bridges, creek and road crossings, rig pads/location).
- Lifting and setting batteries, heaters, & separators.
- Digging and lifting pipelines, and preparing tie-ins (hot or not).
- Collecting & maintaining data for “as-builts.”
- Working with environmentally sensitive areas (erosion avoidance, downsizing location, reclaiming acreage and topsoil, reseeding with new trees, working with BLM and Forestry Service).
- Obtaining bids, making recommendations, and securing construction permits.
- Ensuring proper shaping & leveling.
- Analyzing soil composition and ensuring consistent levelness of the rig.
- QA/QC Inspections (water drainage of all rigsite work areas, topsoil & cuttings storage facilities).
- Separation & metering facilities (sweetening plants, compression/LACT units, flammable/non-flammable).
